- A Just Measure device

- A measuring tape

- A pen or pencil

- Paper

- Scissors

- Fabric

Once you have all of your materials, you can follow these steps to create a custom pattern:

1. **Measure yourself.** Using the measuring tape, measure your bust, waist, hips, and inseam.

2. **Enter your measurements into the Just Measure device.** The Just Measure device will use your measurements to create a custom pattern that is perfectly fitted to your body.

3. **Print out your pattern.** Once you have created your pattern, you can print it out on paper.

4. **Cut out the pattern.** Use scissors to cut out the pattern pieces.

5. **Sew your garment.** Follow the instructions on the pattern to sew your garment.

With Just Measure, you can create a wide variety of garments for women and girls, including:

- **Dresses:** A-line, empire waist, maxi, mini, shift, sundress, wrap dress

- **Skirts:** A-line, circle, gathered, pencil, pleated, tiered

- **Tops:** Blouse, button-down shirt, crop top, tank top, t-shirt, tunic

- **Pants:** Capris, leggings, jeans, sweatpants, wide-leg pants

- Use the right fabric for your garment. The type of fabric you use will affect the fit of your garment. For example, stretchy fabrics will fit more closely to the body than non-stretchy fabrics.

- Take your time measuring yourself. The more accurate your measurements are, the better the fit of your garment will be.

- Follow the instructions on the pattern carefully. If you don't follow the instructions carefully, you may end up with a garment that doesn't fit properly.

- Make adjustments as needed. Once you've sewn your garment, try it on and make any necessary adjustments. For example, you may need to hem the garment or take it in at the waist.

Just Measure is a powerful tool that can help you achieve the perfect fit for any garment. With Just Measure, you can easily create custom patterns that are guaranteed to fit perfectly. So what are you waiting for? Start sewing today!
