

# **The Italian Job Two: The 200mph Steamroller - An Engineering Marvel**

## **The Design of the 200mph Steamroller**

The 200mph steamroller was designed by a team of engineers led by Chris Corbould. Corbould is a veteran special effects supervisor who has worked on a number of high-profile films, including the James Bond films and the Fast and Furious franchise.

- A reinforced body that is designed to withstand impacts
- A roll cage that protects the driver in the event of a rollover
- A fire suppression system that can extinguish fires in the engine or fuel tank
- A remote control system that allows the steamroller to be operated from a distance

## **The Construction of the 200mph Steamroller**

The 200mph steamroller was constructed at Pinewood Studios in the United Kingdom. The construction process took several months and involved a team of skilled engineers and technicians.

## **The Testing of the 200mph Steamroller**

The 200mph steamroller was tested at a number of locations, including the Bruntingthorpe Proving Ground in the United Kingdom. The testing process involved driving the steamroller at high speeds and testing its handling and

braking. The steamroller also underwent a number of crash tests to ensure that it was safe to drive.
